Changes in cardiovascular disease (CVD) risk factors can be brought about by intervening at the population and individual level. Government has addressed “ and continues to address “ the risk factors at both levels.

### **Cardiovascular disease prevention | Guidance and**

Maternal physiological changes in pregnancy are the adaptations during pregnancy that a woman’s body undergoes to accommodate the growing embryo or fetus. These physiologic changes are entirely normal, and include behavioral (brain), cardiovascular (heart and blood vessel), hematologic (blood), metabolic, renal (kidney), posture, and respiratory (breathing) changes.

### **Maternal physiological changes in pregnancy - Wikipedia**

1.3.1.7 When prescribing ezetimibe co-administered with a statin, ezetimibe should be prescribed on the basis of lowest acquisition cost []. [2016] 1.3.1.8 For the purposes of this guidance, appropriate control of cholesterol concentrations should be based on individualised risk assessment according to national guidance on managing cardiovascular disease in the relevant populations [].
