Engineering a Better World. Working as an engineer in the upcoming decades, you will have the chance to play a critical role in making the world a better place.

Department of Civil and Environmental Engineering

Traffic engineering is a branch of civil engineering that uses engineering techniques to achieve the safe and efficient movement of people and goods on roadways. It focuses mainly on research for safe and efficient traffic flow, such as road geometry, sidewalks and crosswalks, cycling infrastructure, traffic signs, road surface markings and traffic lights.

Traffic engineering (transportation) - Wikipedia

Welcome to the Department of Civil and Environmental Engineering (CEE), where high-quality instruction and world-class research covers a diverse range of engineering disciplines including structural, environmental, geotechnical, water resources, transportation, and more.

Department of Civil & Environmental Engineering - ODU

Ryerson University is well known for its applied education and the Department of Civil Engineering exemplifies this quality. We offer an undergraduate Bachelor of Engineering (B.Eng.) degree, as well as post-graduate degrees at the Masters and Doctoral levels that afford students the opportunity to engage in cutting-edge research.

Civil Engineering at RU - civil - Ryerson University

Many software programs are available for each discipline of civil engineering. Most civil engineers practice in specialized subsets of civil engineering, such as geotechnical engineering, structural engineering, transportation engineering, hydraulic engineering, environmental engineering, project and construction management and land surveying.

Civil engineering software - Wikipedia

The Engineering area contains most of the reference material needed to design and construct a Capital Program project. Included are topics about Policy, Procedures, Specifications and Design Standards (Manuals, Guidelines, and Computer Aided Design and Drafting drawings).

Engineering - New Jersey

Civil engineering design software allows users to draft complex 3D designs of municipal buildings and structures. These tools include those with functionality for railway modeling, road and highway design, and mapping tools—essentially helping with anything pertaining to the city's infrastructure.
