Free software or libre software is computer software distributed under terms that allow users to run the

software for any purpose as well as to study, change, and distribute it and any adapted versions. Free software is a matter of liberty, not price: usersâ€™ individually or in cooperation with computer programmersâ€™ are free to do what they want with their copies of a free software (including ...

Free software - Wikipedia

Beam-powered propulsion, also known as directed energy propulsion, is a class of aircraft or spacecraft propulsion that uses energy beamed to the spacecraft from a remote power plant to provide energy. The beam is typically either a microwave or a laser beam and it is either pulsed or continuous. A continuous beam lends itself to thermal rockets, photonic thrusters and light sails, whereas a ...

About Smart Research: Originally formed by Alan Smart for the development of high performance audio equipment. He has worked in the professional audio industry for some 20 years since starting as an assistant engineer in Wave Studios in London, and then as an electronics engineer at Digital Audio Systems, who provided Sony PCM mastering systems to UK studios; manufactured Weber test tapes, and ...

A Geant4 application is defined by the use of an instance of the G4RunManager class or of a user-defined class derived from it. This class defines the main interaction with the user: it provides interfaces to define the user initializations (e.g. geometry and physics definitions) and the user actions that permit interaction with the simulation kernel and retrieve output information.

Iâ€™ve been surrounded by a lot of debate, since the HP printer vulnerability controversy sparked up (like the pun?) earlier this week. If youâ€™ve NOT been living with your head buried in the sand the past few days, then youâ€™ve not doubt heard that security researchers have dug into some inherent functionality in HP printers and figured out a way to use it to do some things that could cause ...
